PROFESSIONAL SUMMARY

Backend Java Developer in training, pursuing a Bachelor's degree in Software Engineering at Estácio (2024–2028). Hands-on experience building secure, well-documented REST APIs with Java 21, Spring Boot, Spring Security (JWT), JPA/Hibernate, PostgreSQL, and MongoDB. Implemented automated tests (101+ tests with JUnit 5 and Mockito), Docker containerization, and a CI/CD pipeline with GitHub Actions on real portfolio projects. Seeking an internship or junior backend developer role to apply and grow my skills in a professional environment.

TECHNICAL SKILLS

Languages & Frameworks: Java 21, Spring Boot 4, Spring Security, Spring Data JPA/Hibernate, Bean Validation

Databases: PostgreSQL, MongoDB

Authentication & Security: JWT (JSON Web Token), RBAC (Role-Based Access Control)

Automated Testing: JUnit 5, Mockito, MockMvc, @WebMvcTest

DevOps & Tools: Docker, GitHub Container Registry (GHCR), GitHub Actions (CI/CD), Git, GitHub, Maven, Postman

Containerization & Orchestration (fundamentals): Docker, Kubernetes (fundamentals), Docker Swarm (fundamentals)

API Documentation: Swagger / OpenAPI 3

Architecture: REST APIs, Layered Architecture (Controller/Service/Repository)

Best Practices: Clean Code, Conventional Commits, constructor injection, Code Review

Methodologies: CI/CD, Agile, Scrum

PROJECTS

FinanceSync API — *Personal Project (Portfolio) · Backend Java · Spring Boot 4 · JWT · PostgreSQL · Docker* | 2025–2026

- REST API for personal finance management with 4 entities (user, account, transaction, category), JWT authentication, and role-based access control (RBAC); validation with Bean Validation and documentation via Swagger/OpenAPI.
- Implemented real-time currency conversion by integrating the Frankfurter API, using BigDecimal for monetary precision.
- Wrote 101 automated tests (JUnit 5, Mockito, MockMvc, @WebMvcTest) covering the service and controller layers.
- Containerized the application with Docker and published the image to GitHub Container Registry (GHCR).

TaskFlow API — *Personal Project (Portfolio) · Backend Java · Spring Boot 4 · JWT · PostgreSQL* | 2025

- REST API for task management with stateless authentication via Spring Security + JWT and role-based access control (RBAC).
- Layered architecture (Controller, Service, Repository), persistence via JPA/Hibernate and PostgreSQL, documentation with Swagger/OpenAPI.

LifeSync API — *Personal Project (Portfolio, in development) · Backend Java · Spring Boot 4.1 · Spring Security* | 2026

- Intelligent personal organization system (tasks, habits, goals) built with Java 21, Spring Boot 4.1, Spring Security, and JPA/Hibernate with PostgreSQL, following a feature-package architecture.
- Implemented a CI/CD pipeline with GitHub Actions and integration tests with Testcontainers.

EDUCATION

Estácio — Bachelor's Degree in Software Engineering

In progress | Start: March 2024 — Expected graduation: March 2028

CERTIFICATIONS

- [Complete Java: Object-Oriented Programming + Projects](#) — Udemy (Nélio Alves), 54h, Feb 2026
- [Testing with JUnit 5, Mockito, and Spring Boot \(REST APIs\)](#) — Udemy (Valdir Cezar)
- [Docker for Developers \(with Docker Swarm and Kubernetes\)](#) — Udemy (Matheus Battisti)

LANGUAGES

Portuguese — Native

English — Intermediate (technical reading: documentation, articles, and repositories in English)
